

Dead Volume-free High Pressure Fitting

Ultra-high Pressure
Hand-tightening Pressure Reach 130Mpa

Pressure Resistance
up to **130Mpa**

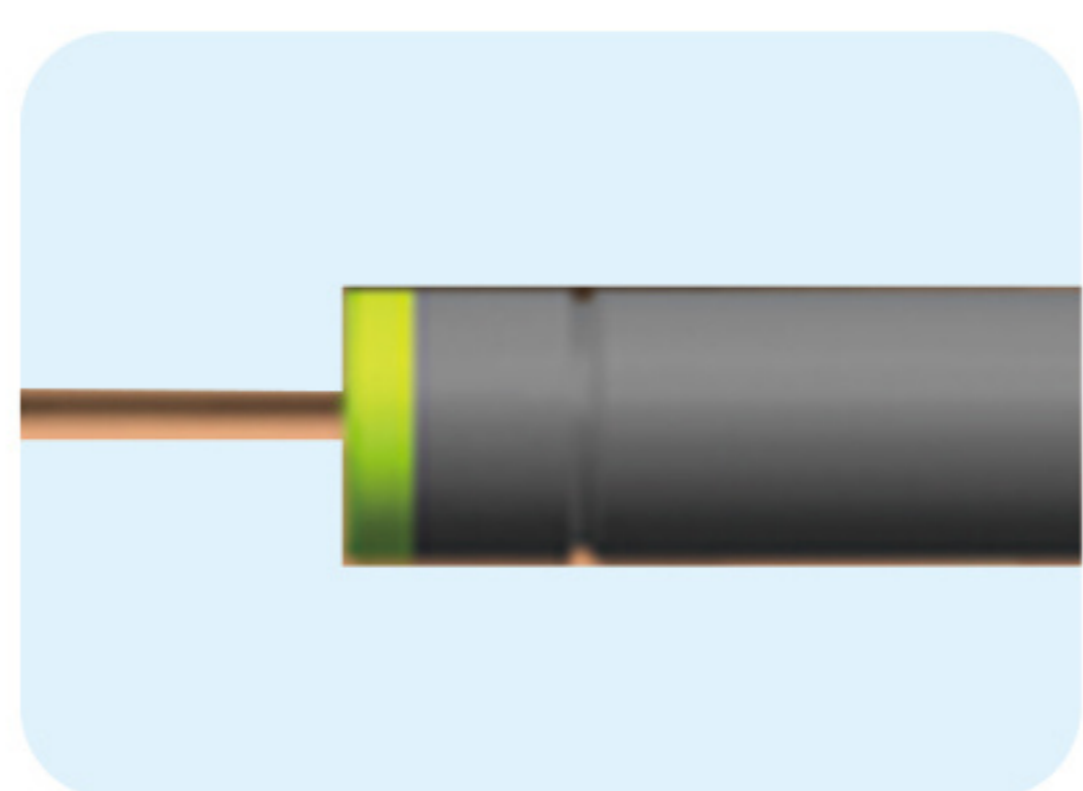

1. High pressure resistance up to 130Mpa regular PEEK fitting can only withstand pressure of 30Mpa.
2. dead volume-free by flat sealing of PEEK front- end no residue.
3. capillary replaceable, long service life.
4. Different length customized.

Installation Diagram

1. Prepare for capillary;
2. Place the capillary from the fitting position into the centre of the fitting;
3. Place the plug into the capillary tube;
4. Plug pressed into fitting inside hole;
5. Once assembled, screw directly into the column and tighten. Advisable torque of 0.3N.m.
